**General Information:**

- If you have ever been diagnosed with or had symptoms of the following, you may be at increased risk of injury or health problems when conducting research at UAB.
 

Skin rashes	Glove Allergies/rashes	Allergies to animals, dander, and/or hair
Asthma	Muscle or bone problems	Allergies to pollen, food, etc.
Latex Allergy	Mitral valve prolapse	Repetitive motion injury (i.e., carpal tunnel)
Diabetes	Repeated episodes of diarrhea	Problems with visual acuity, hearing ability
Hernia	Splenectomy (missing spleen)	Allergic skin problems, eczema
Seizure disorder	Drug or alcohol dependency	Family history of hay fever, asthma
- If you are pregnant or if your immune system is suppressed, you may be at increased risk. Please make sure your private/personal physician knows about your job duties.
- Personnel working with certain animals may require immunizations specific to that species.
- If you have any disability (limitation) for which you believe an accommodation is needed for you to perform your job, it is your responsibility to inform your supervisor and request a workplace accommodation.
- To minimize risks to personnel, health screening at the beginning of the job and at periodic intervals is recommended for certain job categories.
- An annual tuberculosis (TB) screen is required for those in contact with nonhuman primates.
- Vaccination against TB by Bacillus Calmette-Guerin (BCG), does not exclude one from annual TB screening requirements.

**Assurances:**

I certify that information provided is true and complete to the best of my knowledge. I understand that any intentional false statement or omission of facts may be grounds for dismissal.

I have read the information in this form. I am aware that some health conditions may increase my risk to injury or illness when working with research animals. I understand that I should make my physician aware of these conditions and my duties.
